PRESS RELEASE

Vision Dealer Solutions – SOC 2 Type 2 Compliant

Vision Dealer Solutions DBA (VisionMenu, Inc.) is proud to announce that we've received a clean SOC 2 Type 2 attestation report for 2025. We first became SOC 2 compliant in 2023 and have remained committed to staying continuously compliant. This assurance is evident in our most recent SOC 2 audit. This rigorous, independent assessment of our internal security controls serves as validation of our dedication and adherence to the highest standards for security, confidentiality, and availability.

Vision Dealer Solutions' SOC 2 Type 2 report did not have any noted exceptions and was therefore issued with a "clean" audit opinion. Conducted by Sensiba, LLP (Sensiba), a nationally recognized CPA firm registered with the Public Company Accounting Oversight Board, this attestation report affirms that Vision Dealer Solutions' information security practices, policies, procedures, and operations meet the rigorous SOC 2 Trust Service Criteria for security, confidentiality, and availability.

This is an important milestone but is in no way an end to our commitment to our customers and the security of their data. Vision Dealer Solutions views security as the foundation upon which our products are built and upon which trust with our customers is earned and maintained.

Vision Dealer Solutions uses an automated security platform to continuously monitor its internal security controls against the highest possible standards. With this automated security platform, we have real-time visibility across the organization to ensure the end-to-end security and compliance posture of our systems.

Developed by the AICPA, SOC 2 is an extensive auditing procedure that ensures that a company is handling customer data securely and in a manner that protects the organization as well as the privacy of its customers. SOC 2 is designed for service providers storing customer data in the cloud.

We welcome all customers and prospects who are interested in discussing our commitment to security and reviewing our SOC compliance reports to contact us.
